Learn if There're Oxygen Events

A quick glance in the morning tells you your sleep blood oxygen levels, resting heart rate and body movements.

Know How Severe Your Breath Stopped

In addition to tracking your oxygen level per second, O2Ring also detects how long your oxygen below 90%, how many times O2 drops over 4% during the whole night.

Get More Detailed Info

Tap the Magnifier icon, know the exact value of your O2 and heart rate when events happened.

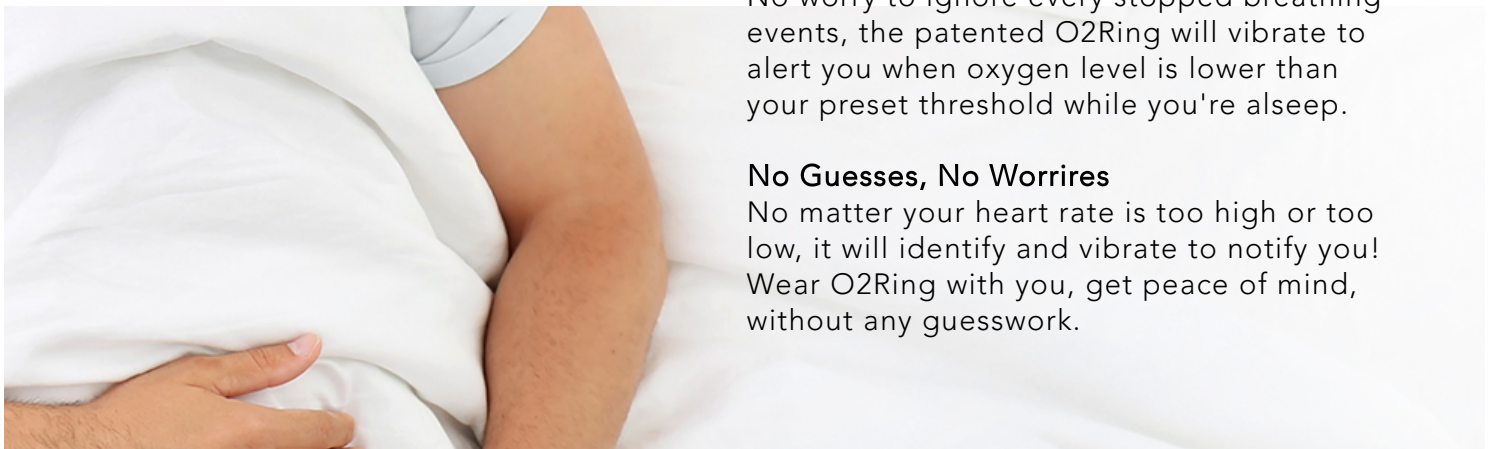

Smart Vibration Alert Delivers Peace of Mind

Breathe More, Sleep Better

No worry to ignore every stopped breathing events, the patented O2Ring will vibrate to alert you when oxygen level is lower than your preset threshold while you're asleep.

No Guesses, No Worries

No matter your heart rate is too high or too low, it will identify and vibrate to notify you! Wear O2Ring with you, get peace of mind, without any guesswork.
