Gary,

Tentatively next week. It may be impacted by the open CARs though and I won't know until we schedule those next week.

Mike,

I think we can start it next week. I will see if Christopher can work it in.

Mike,

When can we do this?

Mike, Doug,

We currently use the 163061S IC on our 3xx and 19xx PCBoards. I would like to request a board

change so we can use either the 163061S (surface mount) or the 163061 (through hole) version of the part. Reason being is that we have (according to EVO) 2,904 of the 163061 through hole version in stock (at \$7.349ea). If we modified our 3xx and 19xx boards, then we could start using up this through hole inventory that is just sitting there. Please advise so maybe we can incorporate the change into the next buy cycles?

Thanks,

Gary
