

Photodiode modules

C10439 series

Integrates photodiode for precision photometry with low-noise amp

The C10439 series photodiode modules are high-precision photodetectors that integrate a photodiode and a current-to-voltage amplifier. The output from these photodiode modules is an analog voltage and can be easily checked with a voltmeter, etc. Since their sensitivity is switchable between two ranges (High/Low), highly accurate output can be obtained by selecting the proper sensitivity range that matches the light level to be detected.

Features

- Voltage output for easy handling
- Two-range (High/Low) switching function
- Only half size of a business card
- Can be mounted on optical bench rod (M4)

Applications

- Precision photometry, light source power monitors, fluorescence detection of printed matter, illuminometers, color difference meters, brix meter, flowmeters (C10439-01/-02/-03/-07/-08/-09/-10/-11)
- Gas detection (CH₄, CO₂, CO, etc.), flame detection (C10439-14)
- Spectrophotometers, radiation thermometers (C10439-15)

Structure

Type no.	Photodiode type	Photosensitive area (mm)	Dimensions (mm)
C10439-01	Si	2.4 × 2.4	19 × 46 × 52
C10439-02		5.8 × 5.8	
C10439-03		10 × 10	
C10439-07		2.4 × 2.4	
C10439-08		5.8 × 5.8	
C10439-09		10 × 10	
C10439-10	InGaAs	φ1	19 × 50 × 52
C10439-11		φ3	
C10439-14	InAsSb	0.7 × 0.7	19 × 50 × 52
C10439-15	Si	2.4 × 2.4	19 × 50 × 75
	InGaAs	φ1

*1: No dew condensation

When there is a temperature difference between a product and the surrounding area in high humidity environment, dew condensation may occur on the product surface. Dew condensation on the product may cause deterioration in characteristics and reliability.

Note: Exceeding the absolute maximum ratings even momentarily may cause a drop in product quality. Always be sure to use the product within the absolute maximum ratings.

Accessories (unit: mm)

- Instruction manual
- Cable for power supply (no connector on one end)

KACCA0194EA

Options (sold separately, unit: mm)

Optical fiber adapter A12781 series

This adapter is used to connect an optical fiber to the photodiode module.

Three connector types are available: FC, SC, and SMA.

Note:

- The optical fiber is not included.
- It may not be possible to monitor the total light level depending on the combinations of the photodiode, optical fiber, and fiber adapter that you are using. Select the appropriate components by carefully designing the optical system.

■ A12781-01 (for FC type optical fiber)

■ A12781-02 (for SC type optical fiber)

■ A12781-03 (for SMA type optical fiber)

<Assembly procedure>

Fix the optical fiber adapter in place using the M3 screw holes in the front of the case. (M3 screws are supplied with the adapter.)

Optical fiber (SMA type) A9511

This SMA type optical fiber can be used with the photodiode module. The combination of this optical fiber with the SMA type optical fiber adapter (A12781-03) makes it easy to connect an optical fiber to the photodiode module.

Note: The SMA type optical fiber adapter (A12781-03) is not included.

■ Specifications

Photosensitive diameter: $\phi 2$ (bundled fiber)

Photosensitive numerical aperture: 0.56

KACCA0333EA

BNC cable E2573

This cable can be used to extract signals from the photodiode module.

■ Specifications

Cable specifications: 1.5D-QEV

KACCA0334EA

Signal processing unit for photodiode module C10475

This unit converts the output from a photodiode module (C10439 series) into digital signals. High resolution digital output (16 bits) can be retrieved through a serial connection (RS-232C) from a PC. The supplied sample software can be used to easily load measurement data. For the specifications, refer to the C10475 datasheet.

■ Specifications

Size: 110 × 100 × 30
