Line-Interactive Tower UPS with LCD

This line-interactive UPS system protects your valuable equipment from damage, downtime and data loss.

- Battery backup supports equipment during outages.
- AVR corrects power sags (brownouts) and overvoltages.
- Surge protection blocks harmful transient voltages on AC, phone, network and coaxial lines.
- The multifunction LCD screen displays power conditions and provides easy access to settings.
- The USB port connects to a computer for power management and automatic file saves.
- The 3-year warranty reflect Tripp Lite's commitment to product quality and customer satisfaction.

Key Specifications

- Model: SMART1500LCDT
- Load Capacity: 1500 VA (900 W)
- Nominal AC Input/Output: 120 V, 50/60 Hz
- AC Outlets: 10 x 5-15R (5 UPS, 5 Surge-Only)
- Output Waveform (AC Mode): Sine Wave
- Output Waveform (Battery Mode): PWM Sine Wave
- Input Cord: 6 ft. (1.8 m) Cord with 5-15P Plug
- Half-Load Runtime: 10 min. (450 W Load)
- User-Replaceable Battery: Yes (2 x RBC51)
- Weight: 27 lb. (12.3 kg)

Features

Power Protection and Battery Backup for Home and Office

Between severe weather, the aging electrical grid and hazards lurking inside your own walls, your equipment is under constant attack from power problems. Even a brief loss of power or a momentary surge can ruin your equipment and destroy irreplaceable data. Prevent damage, downtime and data loss by installing this UPS system. It conditions incoming AC power, provides enough battery backup to outlast most outages and automatically saves open files and shuts down computers gracefully during extended blackouts.

View larger

Common Applications

- Protect Home and Office Computer Systems:

Workgroup Servers, Media Servers, High-Performance Workstations, Office Computers, Gaming PCs, Displays, Inkjet Printers, Modems, Switches, Wireless Routers, Scanners, Storage.

- Protect Audio/Video Equipment:

HDTVs, DVRs, Video Game Consoles, DVD and Blu-ray Players, Stereos, Surround Sound Systems, Sound Bar Speakers, Streaming Media Players, Home Theater PCs, Cable/Satellite Receivers.

View larger

Reliable Battery Backup

- Single-Computer Runtime: This UPS system will support an energy-efficient desktop computer and LCD monitor (75 W load) for up to 90 minutes during an outage.

- Half-Load Runtime: This UPS system will support a 50% load (450 W) for up to 10 minutes.

- Optimized Outlet Array: 5 outlets have both battery backup and surge/noise protection, and 5 have surge/noise protection without battery backup. The 'surge-only' outlets allow you to connect additional equipment without overloading the UPS or reducing the backup runtime available during an outage. Select outlets have extra-wide spacing to accommodate bulky AC adapters without blocking adjacent outlets.

View larger

AVR and Surge/Noise Protection

In locations with chronic voltage problems, frequent switching to battery drains reserve power and shortens battery life. This UPS system has a feature called automatic voltage regulation (AVR) that solves the problem. The UPS detects when input voltage is out of bounds and corrects it without using the battery.

All Tripp Lite UPS systems also include built-in surge protection and noise filtering to shield your equipment from destructive transient voltages and electromagnetic (EMI/RFI) line noise.

View larger

Data Line Surge Protection

Data lines connected to your equipment represent an unlocked 'back door',allowing surges to enter and damage or destroy sensitive electronic components. In addition to protecting against surges on the AC power line, this UPS system protects your equipment against surges on connected phone, network and coaxial lines

- The RJ45 jacks protect a phone, analog modem, DSL modem or Ethernet network line.

- The coaxial connectors protect a cable TV, satellite or cable modem line.

View larger

Multifunction LCD Screen

The illuminated LCD provides easy access to detailed UPS settings and information. The LCD shows a variety of helpful data, including input/output voltage, battery voltage, input/output frequency, load/charge level meters, output load percentage, output load wattage, power status, battery status, AVR status and estimated battery backup runtime in minutes.

View larger

Flexible Management Options

There are three ways to manage this UPS system:

1. Use the multifunction LCD screen.

2. Use the HID-compliant USB port and your computer's built-in power management features.

3. Use the USB port with Tripp Lite's free PowerAlert software.

View larger

ROHS Design

- High Efficiency: This UPS system saves energy, produces less heat, shrinks your carbon footprint and reduces annual operating costs.

- User-Replaceable Battery: This UPS system has a user-replaceable, recyclable battery, allowing it to remain in service instead of going to a landfill.

- RoHS Compliance: This UPS system complies with the RoHS (Restriction of Hazardous Substances) Directive, limiting the use of hazardous substances in manufacturing.

Why Choose Tripp Lite?

Founded in 1922 in Chicago, Illinois, Tripp Lite is a leading manufacturer of products to power, connect and protect your equipment. With a large selection of connectivity products, Tripp Lite has everything from USB hubs and reversible USB cables to fiber-optic cables and over Cat5e/Cat6 signal extenders. Whether you need to connect high-speed networks to switches, routers and servers in your data center, or send high-resolution video signals to displays and digital signs, Tripp Lite has the complete solution. Plus, before and after your purchase, our Chicago-based, in-house technical support specialists are available to assist you by phone, email and live chat. With over 90 years of quality products and service, Tripp Lite is a brand you can trust.

Product description

Size:**1500VA/900W** | Style:**Single**

The SMART1500LCDT SmartPro LCD 120V, 1500VA/900W Line-Interactive Uninterruptible Power Supply provides battery backup and AC power protection against blackouts, brownouts, power surges and line noise that can damage electronics or destroy data. Ideal for backing up your desktop computer or audio/visual components, this line-interactive UPS switches to battery backup mode in milliseconds to keep your connected equipment running long enough to save files and shut down safely with no data loss. While all ten NEMA 5-15R outlets protect against surges, five outlets also provide up to 90 minutes of UPS battery support for a basic desktop PC and LCD monitor and up to 10 minutes of support at half load (450W). Automatic voltage regulation (AVR) corrects undervoltages as low as 92V and overvoltages as high as 150V without using any battery power. EMI/RFI noise filtering improves your equipment's performance and prevents damage. A 650-joule surge suppression rating protects your equipment from harmful power surges. NEMA 5-15P plug with 6-foot cord connects to any NEMA 5-15R socket. Large LCD screen shows real-time input voltage, overload, AVR, remaining battery runtime and battery statuses at a glance. Alarm sounds to indicate power loss or low battery. With Tripp Lite's PowerAlert software (available via free download), SMART1500LCDT enables safe unattended system shutdown and file saves in case of a prolonged power failure.

Unit does NOT auto start

Reviewed in the United States on May 29, 2018

Size: 1300VA/720W   Style: Single   **Verified Purchase**

There is a major flaw with this device and almost all similar Tripp Lite devices except the SU series. And that is the unit does not auto turn itself ON. Here's what I mean. Say you have a router plugged into this device and power is lost to your home. This unit will keep the router powered just fine, until this unit's battery is drained. Believe it or not, when power to the home is restored this unit will NOT auto-turn ON and send power to the router. You have to manually push a button on this unit to start it. This is hard to believe. I have confirmed it with Tripp Lite tech support. In my case I am leaving my home for a few months so no one would be around to push this unit's ON button. Tech support's answer was to return this unit to Amazon and buy one of their more expensive SU products. Or, to not use the product when I am away from home and leave the router plugged into a normal outlet. Who would have designed a UPS unit where you have to be present to turn it ON? And where it couldn't turn itself ON?

Avoid!!! Item was defective. No service ...

Reviewed in the United States on March 27, 2017

Size: 1500VA/900W   Style: Single   **Verified Purchase**

Avoid !!! Item was defective. No service on return or refund offered. It was clearly defective when built. There was a crack in the side and a wire sticking out from the side and had a strong burnt electrical smell. I was afraid of the thing in my house.

Quick Generator Test

Reviewed in the United States on February 20, 2014

Size: 1300VA/720W   Style: Single

We live in an area where our power has been going out more frequently each year. So we tested five units on generator power.

With the generator running (Westinghouse 7500e), the test is with approximately 3000 watts running the house......

APC BE550G continually clicked over to the battery (back and fourth).

CyberPower CP1000AVRLCD, CyberPower CP1000PFCLCD, and APC BR1000G all accepted the generator power until I turned on the microwave. Then the units continually clicked over to the battery (back and fourth).

Tripp Lite Smart1300LCDT was the only one that accepted the generator power and stayed on the generator power even when I turned on the microwave. In other words, the Tripp Lite did not

Excellent voltage regulation and battery backup.

Reviewed in the United States on October 26, 2016

Size: 1500VA/900W   Style: Single   **Verified Purchase**

I am very happy with this UPS. I did quite a bit of reading before I purchased it because of some of the mixed reviews. I'll cover the ones it seemed were mentioned the most. First: odor. When I first plugged mine in it had a VERY SLIGHT odor for the first couple weeks. I would pretty much have to be sitting right next to it to notice. Second: noise. The fan can hardly be heard when it's running and the unit is virtually silent all other times. Third: Heat. Mine has never been more than barely warm to the touch. Fourth: brightness. The display is what I would describe as a cool blue in color. It doesn't shine light in and of itself so it doesn't light up the room. So unless it is directly in your line of sight while laying in bed with the room completely dark, I wouldn't consider it an issue. Fifth: Output. I noticed some people are concerned about the unit having a pulse modulated sine wave. From what I've read, unless you are running very voltage-sensitive devices such as medical equipment, the output of the unit will work just fine for home electronic equipment. Like anyone else who just purchased a UPS, one of the first things I did was unplug it so it would run on battery power and see how my computer acted. I have a 4Ghz cpu o/c to 4.6 with a 980ti video card running 3dMark11 at max settings pulling about 600 watts and I ran it for about 10 minutes and it didn't even blink so I'm confident that the juice

Muy buen producto PERO...
Reviewed in Mexico on September 3, 2018
Size: 1300VA/720W   Style: Single   **Verified Purchase**

Este producto realmente es de una calidad excepcional, la información que proporciona si es considerable y te enteras de varias cosas de tu instalación eléctrica.

Por la parte del respaldo es el mejor, fácilmente soporte una pc + monitor + modem por una hora sin problemas (inclusive tienes la posibilidad de probar cuanto te va a durar en caso de un apagón con lo que tienes conectado)

Donde hay un detalle (sin ser culpa del producto) es en lo correspondiente a la regulación de voltaje. Hay ciertos comentarios que se quejan del sonido y en parte tienen razón pero hay mas detrás de solo el sonido.

Antes de comprar este producto hay que considerar, en primer lugar, el lugar donde lo vas a colocar. Si es en la oficina, tomando en cuenta el sonido ambiente, no existe mayor problema, pero, si es para la casa el sonido si puede llegar a ser alto. Ahora el sonido es parecido a una antigua PC o a una pequeña

Dr. Tim Parker

Best engineered UPS on the market: it does its job superbly
Reviewed in Canada on March 8, 2015
Size: 1500VA/810W   Style: Single   **Verified Purchase**

Disclosure and confession: I spent two decades reviewing UPS systems for several of the largest computer magazines, almost on a yearly basis, and got to know the players in the field quite well, along with their advantages and disadvantages. In almost all the reviews, Tripp-Lite would end up at or near the top of the list of products for their superb engineering, rugged design, and support. Over the years, I've bought quite a few UPSs for personal use, and the vast majority have been Tripp Lites.

So, after buying another high-end computer with all-SSD storage, and suffering through five power glitches in a week of bad weather, it was time to buy another UPS. It was, quite frankly, a no-brainer. This was the unit I chose, based on several facts: I like to have extra capacity in the output, so I wanted at least a 1200VA model, the construction was extremely solid, and the price was competitive. I have not been disappointed. The UPS arrived next day (despite not paying for next-day shipment!), got plugged in, and went to work immediately.

These are not the world's most attractive UPSs, but they are not ugly either, and they are designed to

Not working. Only 30% load, I test the ...
Reviewed in Canada on August 22, 2017
Size: 1500VA/900W   Style: Single   **Verified Purchase**

Not working. Only 30% load (going up to 80% when working), I test the battery and it pass the test. But everytime I have a power cut my computer shut down and the battery show an error message (and yes they are plugged on the black battery powered outlets). I have 3 of these and at least 2 of them have this problem (each one is on a separate breaker). I also have a trip lite air conditioner that once started spitting water on my servers and I read many other users reviews about the same problem with even ice forming and fan exploding. I will never buy a tripp lite product again. On the other hand I have a 5000VA ups by tripp lite that cost me 3000$ and that one has never failed me for years.So it seems their high end products are very good but the lower range is very bad.

And about the warrantee??? Well those cost so much for shipping that it may be just faster and cost same price to buy a product from another brand.

*Edit:after contacting support they sent me free of charge 2 units to replace the defective ones. I had to wait today as there is high wind and power fluctuations to see the one of the new one they sent me

El mejor guardian de tus equipos
Reviewed in Mexico on September 20, 2015
Size: 1500VA/900W   Style: Single   **Verified Purchase**

Compré este No Break (1500VA) para proteger mi PC, Monitor, Pantalla y Xbox One. Sin ningún problema soporta lo antes mencionando tomando en cuenta que XBOX Y PC Juntos consumen gran cantidad de energía. Hasta 40 minutos de energía teniendo conectada la PC con fuente de alimentación de 750 watts, Pantalla Samsung 40 "LCD, Monitor Asus 27 ", Xbox One y el módem para la conexión de internet. El proveedor da 3 años de garantía para las baterias , algo que es muy aceptable. Soporta conexión USB que es una función muy útil para controlar el No Break. Viene con una entrada coaxial que protege los equipos conectados al módem del servicio de internet. Lo recomiendo ampliamente ya que con 3,500 de inversión en este aparato seguramente no compro más que la fuente de poder de mi PC. No duden en que es una buena opción para proteger y prevenir daños por falla eléctrica y tormentas eléctricas. Yo vivo en la ciudad de México y por las tormentas eléctricas se me ha dañado una Xbox 360 y los puertos Ethernet y usb de una PC. El envió es por parte de amazon así que no hay nada que decir más que rápido como siempre.

Big, works on 50 & 60Hz power, SILENT until on battery, & GOOD! :)
Reviewed in Canada on November 16, 2019
Size: 1500VA/810W   Style: Single   **Verified Purchase**

THIS is what a UPS should be.

I haven't got the software running yet
(still rebuilding my machine before sorting out the OS's),
but this *may* work with UbuntuStudio.org Linux
(which is wonderful, complete & free & secure operating system, &
ISN'T a malware-behaviour-modification-spyware system, the way the dominant Operating Systems are..)

I am standardizing on these.

ZeroSurge for front-line surge/spike-defence, of course (if they are still around),
but these for UPS.
