Aims and Scope

The mission of the *Journal of Thrombosis and Haemostasis* is to advance science related to the important medical problems of thrombosis, bleeding disorders and vascular biology through the diffusion and exchange of information and ideas within the international research community. The Journal publishes high quality, original research reports, state of the art reviews, brief reports, case reports, invited commentaries on publications in the Journal, forum articles, correspondence and announcements. Editors invite both fundamental and clinical contributions. These include basic manuscripts on blood coagulation and fibrinolysis, proteins and reactions, blood platelets, and the interaction of all these components with other biological systems such as, but not limited to, the vessel wall, blood cells, and invading organisms. Clinical manuscripts can cover a wide variety of topics including venous thrombosis and arterial disease, plus hemophilia and other bleeding disorders, as well as platelet diseases. The subject area of clinical manuscripts can range from etiology to diagnostics, prognosis, prevention, and treatment.

Subscription information

Journal of Thrombosis and Haemostasis is published in 12 issues per year. Institutional subscription prices for 2021 are:

Print & Online: €1920.00 (Europe), £1513.00 (UK), US\$2017.00 (The Americas), US\$2954.00 (Rest of World). Prices are exclusive of tax.
